

To: Moody Point Residents
Re: Lot 4 Maintenance for 2010
From: MP4 Committee
at the request of the MPCA Board, a sub committee of the EC

The annual woodlands maintenance program is underway for 2010. Our approved vendor, Bartlett Tree, has come for a walk around, with members of the EC and MP4 Committees, to determine priorities for the year. As soon as conditions permit, Bartlett will start first with work on the MPCA sponsored cutting ONLY. Starting with the NE corner and moving along the trail to the western end, they will work the entire length of Lot 4. Their primary focus will be on healthy woodland management, trail and building safety. If you have a concern that may fall in these areas on Lot 4 please contact one of the representatives below as soon as possible. This work will be funded by the MPCA. Following these 3-4 days of cutting, the vendor will be available for consultations and estimates for Individual Requests. Procedures for which are available on the Moody Point website: go to www.moodypoint.org, then click on *Environment*. All documents referring to the MP4 are listed under *Documents*. If you have trouble receiving or interpreting these procedures please contact any MP4 representative listed below. We ask that you not approach the tree service as they are working with the MPCA funds. The MP4 and EC will be monitoring that project. We hope this system will allow everyone an opportunity to address their own view issues. As always, all work will be done under the guidelines of the NH DES Shoreline Protection Act and the Moody Point Environmental Committee. Thank you for your help.
